INFORMAÇÕES GERAIS E RECOMENDAÇÕES DE INSTALAÇÃO E MANUTENÇÃO

IMAGENS DESTE CATÁLOGO
Este catálogo procura reproduzir com a máxima fidelidade as cores e relevos dos produtos expostos. Entretanto, é possível que as peças reais possuam pequenas diferenças de tonalidade quando comparadas às peças impressas.

NATUREZA ARTESANAL DOS PRODUTOS
Todas as peças cerâmicas são fabricadas manualmente e consequentemente pequenas variações de tamanho, tonalidade fazem parte do produto. Abaixo são informadas as diretrizes e recomendações de instalação e assentamento necessárias para um bom desempenho do produto.

BORDA BRANCA SOBRE AS PEÇAS LISAS E DECORADAS
Todas as peças lisas e decoradas não retificadas possuem um borda lateral branca de 2 mm. Esta borda é inevitável devido ao processo de fabricação.

ÁREAS DE APLICAÇÃO
De maneira geral os produtos Baepi são recomendados para aplicações como pisos e e revestimentos de paredes de internas e externas não sujeitas às intempéries (sol, chuva , etc). Para piso, verifique a classificação da resistência à abrasão (PEI) de cada cor lisa no catálogo.

VARIAÇÃO DE TONALIDADE
Devido à natureza artesanal da fabricação, os produtos Baepi podem sofrer pequena variação de tonalidade em diferentes lotes de produção. Por este motivo, sugere-se que todas as vendas incluam pelo menos 10% de material a mais para cada especificação garantindo que o quantitativo esteja adequado para finalização do projeto e se possível garantir uma sobra para eventuais complementações.

TAMANHO NOMINAL, VARIAÇÃO DIMENSIONAL & JUNTA MÍNIMA ENTRE PEÇAS
Todas as dimensões dos produtos Baepi descritas são nominais. As dimensões reais podem ser ligeiramente diferentes das nominais. Por este motivo, torna-se obrigatório a existência de uma junta mínima entre peças. Este rejuntamento mínimo garante a acomodação das peças, facilitando a modulação e minimizando qualquer variação dimensional.
As juntas mínimas entre peças devem ser de 3mm.

CONFIGURAÇÃO DE MOSAICOS
Todos os mosaicos Baepi são vendidos com um filme trasparente sobre as peças, garantindo assim a regularidade das juntas. Neste caso o assentamento é feito normalmente e a remoção do filme deve ser feita somente após a secagem completa da argamassa.

CUIDADOS NO ASSENTAMENTO
- Não aplicar o material sob condições desfavoráveis, como chuva, sol intenso e vento forte.
- Antes de assentar, assegure que as peças estejam isentas de sujeira ou qualquer material pulverolento.
- Utilize argamassa colante (Ex. Cimentcola Quartzolit) e desempenadeira denteada com dentes de 6x6 mm.
- Evitar exposição prolongada da argamassa. O tempo em aberto máximo não deve ulrapassar os 5 minutos.
- Durante o assentamento, execute o teste de aderência, retirando aleatoreamente algumas peças já assentadas e verifique se o tardoz da peça encontra-se completamente preenchido pela argamassa, com total esmagamento dos cordões da desempenadeira.

LIMPEZA E MANUTENÇÃO
A limpeza do trabalho de assentamento das peças esmaltadas deve ser observada criteriosamente. Possíveis excessos de cimento sobre as peças devem ser limpos antes da secagem com um pano úmido. Ácidos podem reagir com o esmalte e manchar as peças com o tempo. Procure limpar a superfície logo após o contato de alimentos ácidos e alguns produtos de higiene pessoal.

RESPONSABILIDADE DE USO E INSTALAÇÃO
A Baepi não se responsabiliza pelo uso inadequado ou fora das especificações do produto. Não nos responsabilizamos também pela instalação do material, devendo ser realizada por assentador experiente. Em caso de dúvidas, consulte-nos pelo site *www.baepi.com.br*

GENERAL INFORMATION & INSTALLATION AND MAINTENANCE RECOMMENDATIONS

IMAGES IN THIS CATALOG
The images in this catalog try to reproduce with the most possible fidelity the colors and shades of the real pieces. However the real ceramic tiles might present slight shade variations when compared with the pressed ones.

ARTISTIC HANDMADE CERAMIC PRODUCTS
All Baepi products are hand-crafted and are thus subject to minor size and color variations. Below you will find directions and recommendations to a correct installation.

WHITE BORDER OVER PLAIN AND DECORATIVE PIECES
All non-rectified plain and decorative piece will present a 2 mm white border around its perimeter. This is inevitable and is a result of the fabrication process.

APPLICATION AREAS
In general, most tiles and accessories have been designed for horizontal (flooring) and vertical applications in internal areas. For floor applications, please refer to the superficial abrasion resistance (PEI) of each plain color.

COLOR SHADE VARIATIONS
Being hand crafted, Baepi tiles are subject to minor color shade variations from lot to lot. We recommend than an additional 10% should be ordered to all orders for eventual loss, cuts and future use. In case, additional tiles are required to existing installations please supply the factory with a piece of the original so we can match the order as close as possible.

NOMINAL SIZE, SIZE VARIATION & MINIMUM JOINT BETWEEN PIECES
All referred dimensions in this catalog are nominal. Real dimensions can vary slightly. Due to the manufacturing nature of Antigua tiles, all products will present a slight variation in size. This variation, along with other physical characteristics, requires the use of a minimum joint between pieces. The recommended joint thickness is 3 mm

MOSAICS CONFIGURATION
All mosaic products come film mounted (transparent film over the top). In this case, the joints are already given and installation between sheets should keep the same distance. The installation process is the usual and the removing of the film should happen after the mortar is completely dry.

TIPS FOR A CORRECT INSTALLATION
- Do not install tiles under extreme conditions such as rain, freezing temperatures, excessive heat and strong winds.
- Before installing, make sure all pieces are free from dirt or any other particles.
- Use the correct cement mortar for the application.
- Avoid long exposure of mortar. The working time should never surpass 5 minutes.
- During installation, take out some random pieces an check whether their back is completely filled with mortar.

MAINTENANCE
Excess grout during installation of glazed tiles should be removed with a wet clean towel or sponge. Although no standard applies to edge impact, the best advice we can give remains to pay careful attention to detail when grouting to ensure that all edges are afforded maximum protection. Do not acid wash glazed tiles. All foods and other substances containing acid may affect the color of a tile. Always clean spills as soon as possible. Cristalina colors are more subject to acid attack. All glazed surfaces are subject to some wearing or scratching over a period of time. Care should be taken to select the proper tile for a given use.

LIABILITY OF INSTALLATION & USE
Baepi does not assume any responsibility for faulty or inappropriate installation of its products. It does not extend any guarantees, express or implied, as to wear resistance, maintenance, glaze slipperiness or other problems which may occur by incorrect use of our tiles. Any doubts, please consult us at *www.baepi.com.br*
